	SIM-2977	Error while running update FOP from patch step 2100r8n01 during update installation	Professional	Installation-routine, Vartab	Installation-and-Update	Solution: When installing the update, the FOP programs in the individual update steps which have the suffix "FP.POSTVARTAB" are only run after all update steps have been completed and the vartab has been updated in the last update step. The FOPS are executed in the order of the update steps.
