## Improvements

T	Key	Summary (en)	Edition (en)	Labels (en)	Components (en)	Changelog (en)
	SIM-3548	Remove typ command system	Basic, Advanced, Professional	Permissions	Infrastructure, Interface, Planner-Configuration, Simulation-settings	APS users no longer require permissions for the type command system in order to use the program.
	SIM-3608	Adjustments for new installer version	Basic, Advanced, Professional	Installation	Installation	Installer version 0.6.1 is used for installation (various bug fixes).
	SIM-3560	Consider version of already installed APS Basic installation for new installation	Basic, Advanced, Professional	Installation	Installation	The installation of APS Basic and Advanced checks pre-installed APS versions (from version 2201r8n02) and asks for consent for any version downgrade or re-installation of the same version in the interactive installation, or carries out re-installation with a corresponding message in the case of automatic installation, but cancels a version downgrade.
	SIM-3603	Context menu takes too long to display	Basic, Advanced, Professional	Context-menu, Infosystem	Planner-Handling&Views	The context menu display has been accelerated.
	SIM-3564	Read EDP connection information from parameters (Abas)	Basic, Advanced, Professional	Configuration, EDP	Planner-Configuration	The Productionplanner is called up using environment variables.

Release notes | Abas APS 2024.Q3.1 | APS2201r8n02 | Improvements

T	Key	Summary (en)	Edition (en)	Labels (en)	Components (en)	Changelog (en)
	<b>SIM-3565</b>	Read EDP connection information from parameters (Planner)	Basic, Advanced, Professional	EDP, Planner	Planner-Configuration	The configuration file mandant.ini is no longer read for the automatic configuration of the EDP connection to Abas. Instead, APS receives additional program parameters, which are transferred to the application when it is started. This makes it possible to store several clients in the abasgui.ini (mainly relevant for using the MiniGUI) without having to adjust the APS call. You can still configure the EDP configuration manually.
	<b>SIM-3579</b>	Upgrade installation must output information on saving customizations at the end of the script	Advanced, Professional	Customization, Installation	Installation	At the end of an upgrade installation, the recognized customizations and the resulting backup are displayed.
	<b>SIM-3613</b>	Improving the performance of FPRESLINKUSE	Professional	FPRESLINKUSE	Infosystem	Keys were created to improve the runtime of the FPRESLINKUSE information system.
	<b>SIM-3581</b>	Use drill icon from Abas icon set	Professional	Infosystem	Infosystem	The Abas standard icon "drill" is used for infosystems.
	<b>SIM-2337</b>	Enumeration for setup parameters (4913012 FPRUESTPARAART) should only be added during the upgrade	Professional	Call-parameter, Installation	Installation	The update of enumeration 4913912 now keeps individual extensions.
	<b>SIM-3604</b>	Deliver Professional without Basic	Professional	Installation	Installation	When APS Professional is installed, the system checks whether an older APS Basic installation is available. A warning is issued if necessary.
	<b>SIM-3655</b>	Load new simulation (blinking icon in toolbar) for Mini GUI	Professional	Data-procurement	Planner-Handling&Views	Now the icon that blinks to show that a new simulation that was performed in the background is available, and can be loaded in the Planner, is available when using the MiniGUI.
	<b>SIM-3591</b>	Rename alltrotec to Forterro	Professional	spx	Program	The company name "alltrotec GmbH" has been replaced with the name "Forterro Deutschland Abas GmbH".

Bug fixes

T	Key	Summary (en)	Edition (en)	Labels (en)	Components (en)	Changelog (en)
	 SIM-3594	Installation of the call parameter parts list incomplete	Basic, Advanced, Professional	Call-parameter	Call-parameter	Call parameter parts lists have been added to the installation package.
	 SIM-3654	Color-coding in customer view defect for customers without description	Basic, Advanced, Professional	Colors, Customer	Planner-Handling&Views	An error that occurred in the color-coding has been corrected.
	 SIM-3541	Line break in tooltip	Basic, Advanced, Professional	Popup	Planner-Handling&Views	Entering a high zoom factor for the graphic display of the Planner no longer causes incorrect line breaks in tooltips.
	 SIM-3670	Lasso function enables shifting started work slip	Basic, Advanced, Professional	Shifting	Planer-Interactions	When selecting multiple operations, including one or more operations that had already been started, it was possible to move the started operations using drag & drop. The error has been corrected.
	 SIM-3697	UTF-8 encoding not complete in simulation results	Advanced, Professional	Encoding	Simulation	Missing file coding has been added for UTF-8.
	 SIM-3669	Year 2038 problem for shifted operations	Advanced, Professional	Script, Shifting	Simulation	An error that occurred when shifting operations beyond year 2038 has been corrected.
	 SIM-3602	Simulation with Project planning data/service planning data: Employees not considered	Advanced, Professional	Project, Service	Simulation-logic	The capacity for employees with allocated project hours and service reservations is now calculated correctly.
	 SIM-3555	Error when displaying resource links assigned to order production list rows or reservations	Professional	Order-production-list, Reservation, Resource-link	FOP	An error that occurred when displaying resource links assigned to order production list rows in display mode has been corrected.
	 SIM-3471	Error caused by FOP dynamically created by FP.TERM.INPUT if FOP language is not German	Professional	FOP, FOP.TERM.INPUT	FOP	Issue corrected that occurred when calling FP.TERM.INPUT in a client language other than German.
	 SIM-2450	Color-coding for dates not reset after reloading data	Professional	Dates, Planning-Center	Planner-Handling&Views	The color-coding for the load dates function in the table of the Planning Center was not reset after reloading the infosystem. This error has been corrected.
	 SIM-3662	Planner freezes wehn opening the context menu or confirming settings	Professional	EDP	Interface, Planner-Configuration	An error that occurred in the EDP communication, which caused the Planner to freeze, has been corrected.

Release notes | Abas APS 2024.Q3.1 | APS2201r8n02 | Bug fixes

T	Key	Summary (en)	Edition (en)	Labels (en)	Components (en)	Changelog (en)
	SIM-3472	Cyclical timetables without start or end ignored	Professional	Availability, Script, Simulation, Timetable	Simulation	Cyclical timetables without start or end date are now considered.
	SIM-3660	Error message "can't read "gruppeNachfolger": no such variable"	Professional	Completion-confirmation, Grouping	Simulation-logic	A simulation error for work tasks with completion reports that were grouped in APS has been corrected.
	SIM-3600	Apply setting for entering the last simulation model of user by default also to Planning center	Professional	Planning-Center	Workflow-Delivery-Date-Calculation	Now, the setting for entering the last simulation model of the user by default to Planning center, has been added.
	SIM-3612	Field display for FP fields incorrectly set in FPPRODLIST	Professional	FPPRODLIST	Production-control-workflow	Errors that occurred in the handling of the display of screen fields in the FPPRODLIST infosytem have been corrected.
