## New functions

T	Key	Summary (en)	Edition (en)	Labels (en)	Components (en)	Changelog (en)
	SIM-3682	Remove dependencies on G   clwindir and set Linux simulation as standard		FOP, MiniGUI, spx	FOP	The distinction between operating using the mini GUI or the Windows Share is no longer applicable. It is always assumed that the program is operated without the Windows Share. The use of Linux simulation and the APS planner database are therefore the default settings in the APS configuration; the latter option can no longer be deactivated.
	SIM-3562	Change simulator licensing	Advanced, Professional	Licensing	Simulation	A license file is no longer required to use the simulation. Instead, the APS license checkbox in the Abas configuration is read for verification purposes.

## 2 issues

Improvements

T	Key	Summary (en)	Edition (en)	Labels (en)	Components (en)	Changelog (en)
↑	SIM-3758	Remove redundant call parameters for standard APS variables	Basic, Advanced, Professional	Call-parameter	Call-parameter	Call parameter 59000 is no longer extended by the "aps*" variables, as these fields are already entered by the Abas core when order list items are created. During upgrade installation, the "aps*" fields are removed from call parameter 59000.
↑	SIM-3730	Do not install APS Basic if APS Advanced is installed - and correct errors during license request	Basic	Installation	Installation	APS Basic is no longer installed if there is an APS Advanced license.
↑	SIM-3715	Update for Installer 0.6.5		Installer	Installation	Installer version 0.6.4 is used for the installation (support for automatic developments of \$MANDANTDIR/translationWhiteListInd and bug fixing).
↑	SIM-3701	Explicit closing of EDP processes when loading data	Basic, Advanced	EDP	Interface, Planner	EDP connections for loading data are now explicitly closed. This minimizes the likelihood of EDP connections getting stuck and occupying licenses.
↑	SIM-3666	Consider calendar hierarchy when calculating the resource availability	Basic, Advanced, Professional	Available-capacity, Employee, Means-of-production, Scheduling-calendar, Work-Center	Resource-availability	Scheduling calendars in the calendar hierarchy are now considered when calculating the available capacity.
↑	SIM-3760	Update parent relation of Java programs	Professional	AJO	Infrastructure	The AJO configuration has been updated to avoid conflicts with custom class path entries in the client.
↑	SIM-3756	Integrate Screen Merger 1.0.11	Professional	Screens	Vartab-Screen	The Screen Merger 1.0.11 for extending the Abas Standard screens has been integrated into the APS Professional installation.

7 issues

Bug fixes

T	Key	Summary (en)	Edition (en)	Labels (en)	Components (en)	Changelog (en)
	SIM-3726	Project reservations without planned hours displayed	Basic, Advanced	Planner, Project-task, Simulation	Planner-Handling&Views	Project tasks without planned hours are now ignored.
	SIM-3709	Adjustment of file permissions in Windows share cannot handle spaces in folder names	Advanced, Professional	Installation	Installation	Bug fix for adjusting directory permission after installation.
	SIM-3727	Product description not displayed if scheduling type is "empty"	Basic, Advanced, Professional	Customer-view, Product, Scheduling-type	Simulation	Missing product information for the scheduling type "empty" has been added.
	SIM-3708	"te" times incorrectly entered in resource links	Professional	Copy, Resource-link	FOP	Copying order of pieces/quantity and units when copying resource links has been adjusted: first copy unit, then pieces/quantity.
	SIM-3676	Evaluation of capacity reductions/increases incorrect if times and durations are filled	Professional	Availability, Available-capacity	Simulation-logic	Old capacity resources can be updated.
	SIM-3570	Table columns are not placed correctly when importing with Screenmerger	Professional	Screen	Vartab-Screen	APS table columns are no longer part of the updates for the following Abas screens: Part:Product, Sales:Quotation, Sales:Order, Purchasing:Work order suggestions, Purchasing:Purchase order suggestions, Purchasing:Reservations, Purchasing:Relocation suggestions, Purchasing:Subcontracting suggestions, Production list:Production list, Calendar:Capacity offer
	SIM-3733	Production Center: Project planning data selection option not hidded despite missing PM license	Professional	Production-Center	Workflow-Productionplanning	The scope has been extended for the data selection option "Project planning data" in the Production Center. The field is hidden if Abas Project Management is not licensed.
